ELECTRIC POWER PLANTS.**

The New Paradigm of Natural Gas

Abundant

Domestic

Clean

Partner to Renewables

Ready Now

AMERICA HAS ENOUGH NATURAL GAS
TO LAST MORE THAN 100 YEARS.
EUREKA!

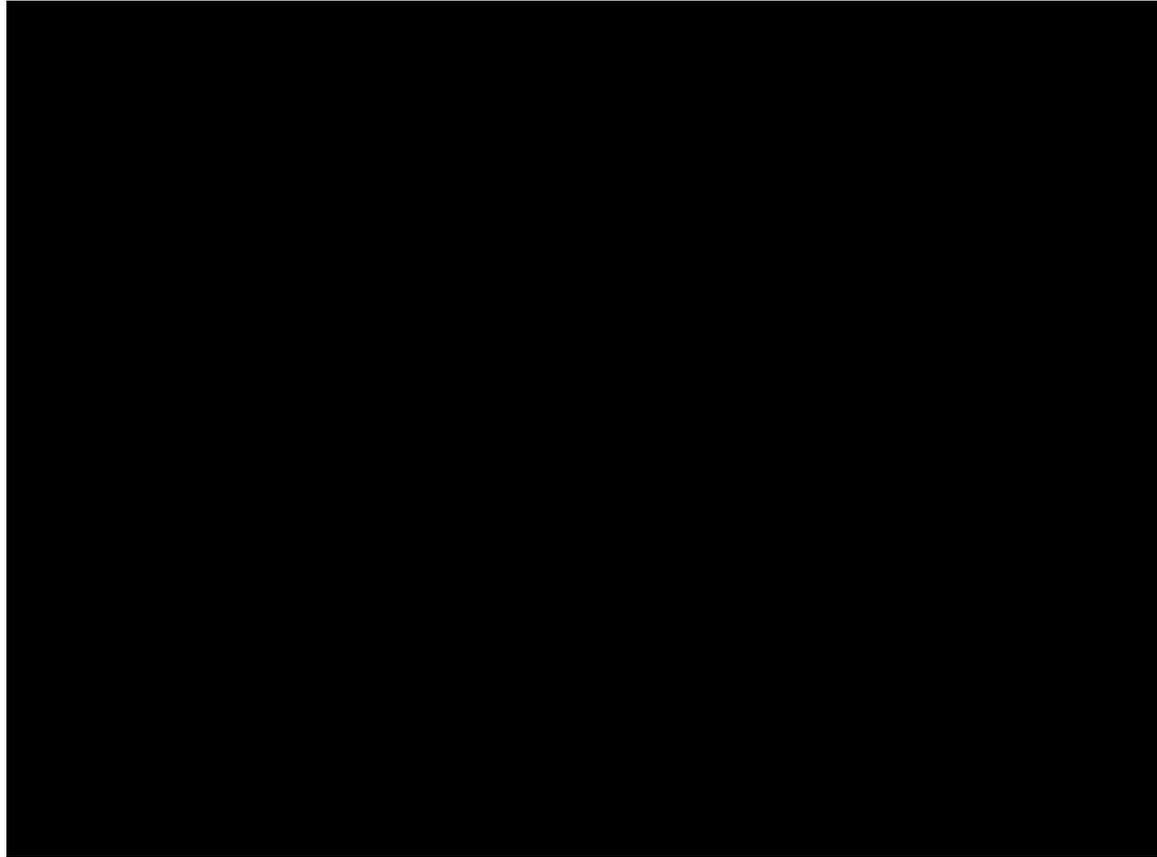

New technologies have doubled our supplies in the past five years and are expected to double again in the next five. Giving us more than 100 years of safe, secure, domestic energy. It's America's way forward. America's clean energy alternative.

AMERICA'S NEW NATURAL GAS 
cleaner. smarter energy.

DC Print Ads: 'Staring Us in the Face'

One solution for cleaner, abundant domestic energy is staring us in the face.

We know we need more reliable, domestic sources of energy.

And we have one.

Today, the U.S. has more natural gas than Saudi Arabia has oil, giving us generations of this clean, domestic energy source.

And a stable supply means stable markets. According to the U.S. Energy Information Administration, the price of electricity from natural gas will remain stable for consumers over the next 25 years.

As Congress and the Administration look for ways toward a cleaner tomorrow, the answer is right here: America's natural gas.

It's the Natural Choice...now, and in the future.

Natural Gas is Cleaner

TYPICAL EMISSIONS FOR COAL-FIRED, OIL-FIRED, AND NATURAL GAS GENERATING PLANTS
(POUNDS PER MEGAWATT-HOUR)

U.S. ENERGY INFORMATION ADMINISTRATION, "NATURAL GAS ISSUES AND TRENDS," 1998.

COMPUTED USING EIA DATE BASED ON THE FOLLOWING CONDITIONS:

- A. COMBINED CYCLE (GAS/STEAM TURBINE PLANT) HEAT RATE OF 6,500 BTU/KW-HOUR (THERMAL EFFICIENCY=52.2%)
- B. SIMPLE CYCLE (GAS TURBINE PLANT) HEAT RATE OF 9,750 BTU/KW-HOUR (THERMAL EFFICIENCY=35.0%)
